

CMPE322 Project1

Scheduler Implementation For an Operating System

Hatice Melike Ecevit - 2016400138

I have develop this project in macOS Mojave. But I have tested in Ubuntu 16.04. It executes with the following instructions on terminal:

```
g++ -std=c++11 project1.cpp  
./a.out
```

It generates a file named output.txt.
